Brainstorm and Idea Prioritization

StaffSync - Modern Human Resource Management Solution

Project	StaffSync - Modern Human Resource Management Solution
Student	Neha Patidar
Enrollment No.	EN24CS3010683
Domain	Information Technology
Stack	MongoDB, Express.js, React.js, Node.js (MERN)

Step 1: Problem to solve

Digitize core HR processes for HR, managers and employees on one web platform.

Step 2: Brainstorm (ideas generated)

Area	Ideas
Employee data	Central employee directory; profile editing; manager mapping
Leave	Online leave form; approve or reject with one click; status tracking
Attendance	Daily check-in and check-out; team and company attendance view
Communication	HR announcements and news board
Learning	Manager-created training programs assigned to team members
Security	JWT login; role-based access; hashed passwords
Extra ideas	Payroll, leave balance, notifications, charts and reports, recruitment

Step 3: Group and prioritize

Priority	Feature	Impact	Effort
High	Authentication and roles	High	Medium
High	Employee management	High	Medium
High	Leave application and approval	High	Medium
High	Attendance (check-in / check-out)	High	Low
Medium	Announcements	Medium	Low
Medium	Training and development	Medium	Medium
Later	Payroll, notifications, analytics, recruitment	High	High

Decision

- Build the six High and Medium items in the first version.
- Keep payroll, notifications, analytics and recruitment for future enhancement.
