Empathy Map Canvas

StaffSync - Modern Human Resource Management Solution

Project	StaffSync - Modern Human Resource Management Solution
Student	Neha Patidar
Enrollment No.	EN24CS3010683
Domain	Information Technology
Stack	MongoDB, Express.js, React.js, Node.js (MERN)

Persona 1: Employee (primary user)

Says	Thinks
• "Did my leave get approved?" • "I need to mark my attendance." • "Where is the latest company notice?"	• Applying for leave should be quick • I want proof that my request was received • Is my data safe?
Does	**Feels**
• Messages the manager for leave • Fills attendance in a register or sheet • Checks several groups for news	• Anxious while waiting for approval • Frustrated by repeated follow-ups • Relieved when status is clear

Persona 2: HR / Manager

Says	Thinks
• "Send me your leave in writing." • "Who is absent today?" • "Update the employee list."	• Too much time goes into manual tracking • Mistakes in records cause trouble later • I need reports quickly
Does	**Feels**
• Maintains Excel sheets • Calls or messages people for approvals • Prepares notices and training lists manually	• Overworked with repetitive tasks • Stressed about accuracy • Confident when everything is in one system

Pains and Gains

Pains	Gains
Delays, lost requests, manual errors, no visibility, scattered data	Fast approvals, one central system, role-based access, clear status, less paperwork
