Performance Testing

StaffSync - Modern Human Resource Management Solution

Project	StaffSync - Modern Human Resource Management Solution
Student	Neha Patidar
Enrollment No.	EN24CS3010683
Domain	Information Technology
Stack	MongoDB, Express.js, React.js, Node.js (MERN)

Objective

Check that StaffSync responds quickly and behaves correctly for all roles. The "Actual Result" column is to be filled after running each test.

Tools

- Postman - API response time and status codes
- Browser DevTools (Network tab) and Lighthouse - page load and UI performance
- Manual testing with three demo accounts (HR, Manager, Employee)

Functional and Performance Test Cases

No.	Test Scenario	Expected Result	Target	Actual Result
1	Login with valid credentials	Token returned, dashboard opens	Under 1 s	
2	Login with wrong password	Invalid credentials message	Under 1 s	
3	Open protected API without token	401 No token	Under 500 ms	
4	Employee calls HR-only API	403 Access denied	Under 500 ms	
5	Apply for leave	Saved with status pending	Under 1 s	
6	Manager approves a team leave	Status becomes approved	Under 1 s	
7	Check-in twice on the same day	Already checked in today	Under 500 ms	
8	Load Employees list	List of employees displayed	Under 1 s	
9	Post announcement as HR	Visible to all roles	Under 1 s	
10	Home page load (Lighthouse)	Performance score recorded	Score 70 or above	

Conclusion

(Write after testing, for example: all test cases passed and average API response time was within the target.)
