Proposed Solution

StaffSync - Modern Human Resource Management Solution

Project	StaffSync - Modern Human Resource Management Solution
Student	Neha Patidar
Enrollment No.	EN24CS3010683
Domain	Information Technology
Stack	MongoDB, Express.js, React.js, Node.js (MERN)

No.	Parameter	Description
1	Problem statement	HR processes are manual, scattered and slow, with no visibility for employees and managers
2	Idea / Solution	A MERN stack web app with role-based dashboards for employee data, leave approval, attendance, announcements and training
3	Novelty / Uniqueness	Manager approvals limited to own team; one unified platform for all core HR tasks; simple enough for small organizations
4	Social impact / Customer satisfaction	Transparency, less stress, faster decisions, paperless workflow
5	Business model (revenue)	Free for small teams; subscription tiers for larger organizations with extra modules
6	Scalability	Modular API and cloud database; new modules such as payroll can be added without changing existing ones
